2 InLine Spacers

1 InLine Bench

DIAGRAM #2

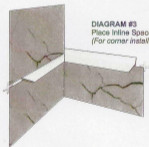

DIAGRAM #3
Place InLine Spacers, as shown.
(For corner installation only.)

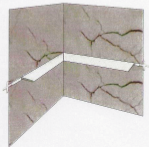

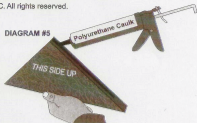

DIAGRAM #4

DIAGRAM #5

Caulk all connecting surfaces of InLine Bench and exposed InLine Spacers.

DIAGRAM #6

Slide caulked InLine Bench onto exposed InLine Spacers with "THIS SIDE UP."

Your InLine Tile Bench has been engineered to include a slope for drainage the reason for "THIS SIDE UP."

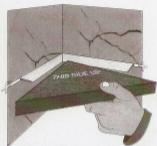

DIAGRAM #7

Follow caulk manufacturers recommendations for curing time and clean up.

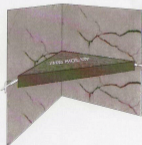

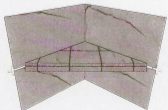

DIAGRAM #8

Set tile on InLine Bench as desired, using modified thin set.

Shelf: Although the InLine Tile Shelf support spacer is intended to produce a tighter grout joint any size of spacer can be used to achieve the desired grout joint width. **Bench:** The InLine Tile Bench support spacer is designed for strength at 3/16". A tighter grout joint may be achieved by trimming tile at spacer to allow tiles to come closer together. **Safety:** Always use gloves, hearing and eye protection, and follow standard safety rules and regulations.
